Training Manual

School Lead:

Create formative assessments + act on **live** student responses!

formative

www.GoFormative.com

1. Go to goformative.com

2. Enter the following assignment code: _____

formative

3. Answer the questions and watch your responses come in **live!**

Quickly Inform Your Teaching

- Decide what to teach next based on trends you see
- Group students based on performance and strategies
- Differentiate learning activities based on student work

"Just by looking at the images, I could see whether they were getting the gist of the poem."

Give every student immediate feedback

- Give instant written feedback that furthers student learning
- Set an answer key, let Formative take care of the grading, and give scores back instantly!

"I can instantly see what you're needing to improve on and let you improve on it...so that on the care meter now it's higher, now it's instant, now you can change it."

Make Sure Every Voice is Heard

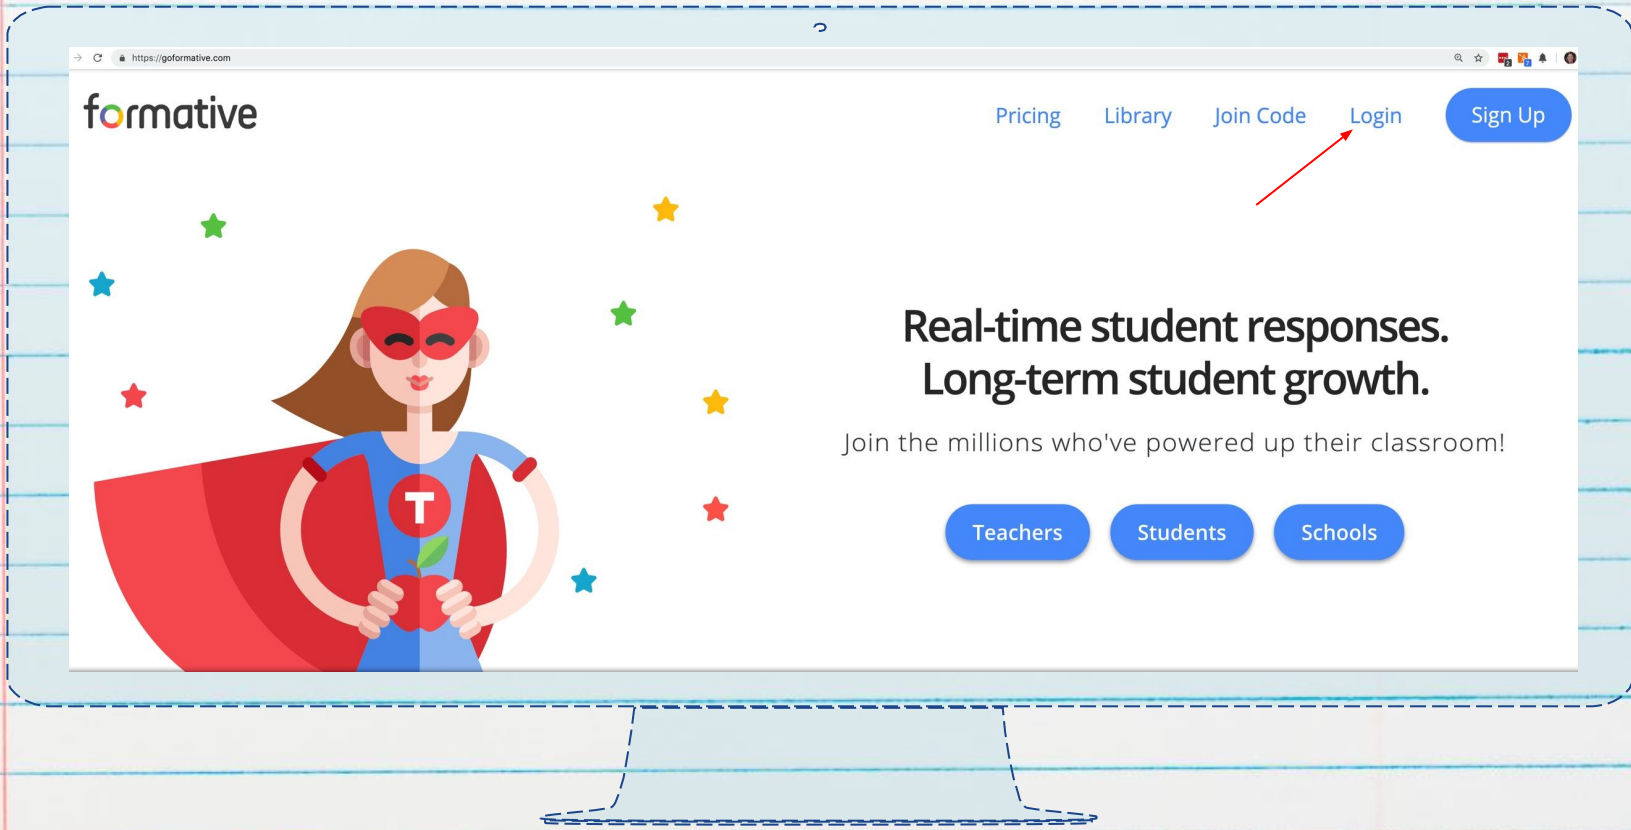

- Project live responses with or without names and scores
- Generate rich class discussions based on student work (exemplars, strategies, misconceptions)
- Engage students! Let them explain their work or the work of a peer!

"I was able to see and praise responses from my students who never raise their hand."
